BITCOIN CASH

DESCRIPTION

Bitcoin Cash is the native digital asset of the first Bitcoin **hard fork** dedicated to increasing Bitcoin’s **block sizes** and **on-chain transaction output**. Similar to Bitcoin, Bitcoin Cash is a permissionless, decentralized, and provably scarce digital currency.

Bitcoin Cash was created to withhold ‘Satoshi’s Vision’ of a network **facilitating peer-to-peer transactions** as its core value proposition (rather than security). The fork was executed on August 1, 2017, in response to Bitcoin’s scalability issues. Pioneered by Roger Ver and Bitmain (a Chinese-based mining pool), Bitcoin Cash is regarded as one of the most successful Bitcoin forks to date.

KEY STATS

Name	Bitcoin Cash
Ticker	BCH
Sector	Currency
Sub-Sector	Value Transfer
Price	\$280.6
Circulating Supply	17,764, 325
Market Value	\$5.08 Billion
Volume	\$2.40 Billion
