DESCRIPTION

**Bitcoin** is the native digital asset of a censorship-resistant, distributed, proof-of-work consensus-based, **peer-to-peer settlement network**. As a provably scarce programmable digital currency, Bitcoin is the first **non-sovereign, decentralized, immutable, digital store of value**. Bitcoin’s are created through mining with a total max supply of **21 Million BTC** that will reach completion in 2140.

While having drawn influence from preceding digital currencies, Bitcoin’s distinguishing characteristic is **Nakamoto consensus** (an incentive structure and set of rules that work in conjunction with proof-of-work consensus). Bitcoin has remained the dominant digital currency throughout its existence withstanding multiple forks and emergent protocols.

KEY PEOPLE

Satoshi Nakamoto

Creator of Bitcoin; anonymously invented Bitcoin in 2008 outlined in a white paper titled “Bitcoin: A Peer-to-Peer Electronic Cash System.”

Barry Silbert

CEO of Digital Currency Group; founded DCG the parent company of Genesis Trading and Grayscale investments, which also runs the Bitcoin Investment Trust.
