DESCRIPTION

XRP is the native digital asset for the **Ripple network**, which aims to **facilitate fast, cheaper interbank payments**. Financial institutions can use XRP to access on-demand liquidity for cross border payments through Ripple’s xRapid product, cutting down on the liquidity costs of pre-funded nostro accounts across many different countries.

The Ripple team states XRP consistently handles more than **1,500 transactions per second (tps)** with aspirations to scale throughput to the likes of today’s incumbent payment processors like Visa and Mastercard. Ripple **surpassed 200 customers** for its flagship payment network, **RippleNet**.

KEY STATS

Name	XRP
Ticker	XRP
Sector	Currency
Sub-Sector	Value Transfer
